

What is my child learning this half term?

Our curriculum is the beating heart of our school and is
rooted in John 10:10

“I came that they might have life and live it to the full”

Within our vision *‘together we grow, together we flourish’*
our children will develop a love of learning and be totally
immersed in different worlds, cultures and times preparing
them for the next stage of their lives.

Spring 2	Year 1/2
Class Novel	Excitingly, each class will be choosing their own class novel this half term to help children have more options over the types of texts that we share together as a class and to provide children more access to new authors. The teachers will share their chosen text with you once their classes have chosen!
Writing	In language and literacy, the children will be starting a new exciting writing programme to help them stack sentences and create their own word banks of verbs, adjectives and adverbs to help them write expanded noun sentences. Our stories this term will be inspired by the books 'George and his Dragon' and 'How to train your dragon.'
Maths	In maths this term, Year 1 and Year 2 will have slightly different focuses. In Year 1, we will be focusing on numbers 1- 50 and using tens frames and part /whole models. In Year 2, we will be learning about the properties of 2-D and 3-D shapes, later moving on to fractions towards the end of the term.
Science	In science this term, children will be looking at food chains and where humans fit within different food chains. We will also be looking at how human food chains can vary depending on if we are vegetarian or vegan. We will be applying all of this knowledge to make our own food chains at the end of term.
RE	During Spring 2, we will continue to learn about Judaism, especially the importance of the Torah as well as some stories that the Jewish and Christian Bibles have in common. We will also look at the festival of Chanukkah and how and why it is celebrated.
History	This term, we will be focusing on the story of the 'Wright Brothers.' During this exciting topic, we will be learning about the history of flight and how this has improved transport links globally.
PE	During indoor PE this term, we will be learning about dance, discovering different ways we can move our bodies to the pulse of music. In outdoor PE, we will be looking at different bat/ball games, learning new skills that we could use in cricket.
RHE	In RHE, we will be learning about how we can stay healthy by choosing the right foods to give us all the nutrients we need.
Forest School	During our Forest School sessions, we will be going on bug hunts and looking at their habitats, as well as sowing seedlings to put into our school garden.
Music	This term in our music lessons, we will be using glockenspiels to learn simple tunes as well as learning about the importance of scales in music.
DT	We are creating yummy treats this half term in our design technology lessons. We will be designing our very own healthy snack for our friends and we are looking forward to trying lots of fruit and vegetables.
